

Technische Universität Berlin offers an open position:

Research assistant - 0.75 working time - salary grade E13 TV-L Berliner Hochschulen
under the reserve that funds are granted

Faculty VII, Institute of Economics and Law / Workgroup for Infrastructure Policy

Reference number: VII-672/17 (starting at 01/02/18 / limited until 31/03/2021 / closing date for applications 05/01/18)

Working field: Involvement in Research (and complementary teaching) at the workgroup and analysis of economic and political economy questions with regards to the design of energy, climate and structural policies for sustainable development. The focus lies on resulting dynamics for the local, regional, national and international level (especially regarding fossil fuels). The position is part of the junior research group „CoalExit - Identifying Building Blocks for Future Regional Transformation Frameworks“, which is coordinated by TU Berlin together with HU Berlin, DIW Berlin and the Hertie School of Governance. The junior research group analyses, amongst others, the question on how global consumption of coal can be reduced by adequate energy and climate policy to contain the consequences of climate change. A special focus lies on opportunities to structure a socially acceptable coal phase-out for Germany. Building on this analysis, the transferability of results will be analyzed for the case study countries India, China, South Africa and Columbia. In parallel, the implications for the international coal market will be investigated. The completion of a PhD is intended.

If you have any questions, please contact Mr. Dr. Pao-Yu Oei (pyo@wip.tu-berlin.de, telephone number +49 (0)30 314-75846. You will find further information about the junior research group and its research topics on the homepage www.wip.tu-berlin.de.

Requirements:

- Candidates must have completed an university degree (Diplom, Master or equivalent) in economics (or business engineering, sustainable management, etc.) or related fields (e.g. political sciences or energy economics)
- Very good study results desirable
- Knowledge about the relevant theoretical areas
- Experiences in numerical modelling or empirical social sciences and the implementation of case studies in the field of sustainability
- Very good English and very good German language skills
